EDUCATION

University of Maryland, College Park **May 2026**
Master of Science in Human-Computer Interaction GPA: 4.0

Relevant Courses: UX Research Methods, Programming Human-Centered Interfaces, Interaction Design, Inclusive Design, Visual Design, Personal Health Informatics

Cornell University **May 2024**
Bachelor of Arts in Information Science (Concentrations in Data Science and User Experience) GPA: 3.90

RELEVANT EXPERIENCE

Federal PMP, UX Designer **Sep. 2025 – May 2026**

- Identified readily available, cost-effective technology solutions and marketing strategies to inform the digital strategy and spread brand awareness.
- Conducted a competitor analysis of 15 organizations and a survey with former Federal PMP students to identify gaps in the PMP exam prep market.
- Led the development of a design system and a redesign of the website based on user interview insights

Campus Coders Crew, Web Developer **Jun. 2025 – Feb. 2026**

- Worked with a team to design and engineer front-end interfaces for 2 client websites using Figma and React.
- Helped implement an interactive search engine prototype, parsing mock data and displaying search results using JavaScript to validate filtering logic.

International Youth Foundation, Digital Development Intern **Jul. 2025 – Sep. 2025**

- Conducted a technical assessment of 11 AI-driven career tools, analyzing the quality of the generated career advice for young English and Spanish speakers.
- Developed a comprehensive digital resource using Framer, delivering AI tool recommendations for various stages of young people's career journey.

Women in Computing at Cornell, Web Developer **Sep. 2022 – May 2024**

- Implemented a redesign of the website using Figma and React that aligns with the club's professional brand image, improving monthly website traffic and extending average user duration to 5 minutes.
- Facilitated a technical workshop to 30+ attendees through a guided, hands-on tutorial on Git version control, branch management, and merge conflict resolution.

Washington's Top News (WTOP), Web Development Intern **Jun. 2022 – Aug. 2022**

- Performed accessibility audits for the WTOP and Federal News Network websites and implemented changes with HTML, PHP, CSS, and WordPress to ensure WCAG compliance.
- Optimized SEO performance by developing regex redirects to resolve 20+ broken URLs, significantly reducing bounce rates and improving site crawlability.

AWARDS

Cornell University Design-a-thon, Designer and First Place Winner **May 2025**

- Designed a travel planning mobile application to encourage tourists to consider more ethical and sustainable travel options as part of a 3-day hackathon.
- Translated research insights from user surveys, market research, and competitor analysis to create an interactive prototype on Figma.
